

Chapter VII. Problems 7.1.6, 7.1.14\*, 7.1.16\*.

Two more problems:

**6-A.** Let  $X$  be an exponential random variable with parameter  $\lambda$ . Find

$$P \left( \left| X - \frac{1}{\lambda} \right| \geq \frac{1}{2\lambda} \right)$$

**6-B.** Let  $X$  be an exponential random variable with parameter  $\lambda$ . Find

$$P \left( \left| X - \frac{1}{\lambda} \right| \geq \frac{2}{\lambda} \right)$$

The starred problems are for extra credit. Each problem is graded on the base of “4 points max”.

Note: the average on the first test is 78 out of 100.
