Assignment #10

7.6-3, 7.6-7*, 11.3-4.

The starred problems are for extra credit.

The second (and last) assignment for 586 students:

7.6-4, 6.7-6, 6.8-12a, 7.7-8, 11.3-2.

Note: For full credit, you need to do 8 out of 9 graduate problems. The graduate problems can be turned in any time before the final exam (there is no other deadline). If you submit your graduate problems well before the final exam and do not get full credit, you can correct your mistakes and resubmit the problems until you get full credit. So the early you start working and submitting the results the better for you.
