

MA 486/586-1G (Statistics), Dr. Chernov
Due Mon, Mar 31

Assignment #11

7th Edition: 8.8-3, 8.8-7*, 10.3-4.

6th Edition: 8.7-3, 8.7-7*, 10.2-4.

The starred problems are for extra credit. Each problem is graded on the base of “4 points max”.

The average on the Midterm Test-II is 87 (out of 100).

The second (and last) additional assignment for 586 students:

7th edition: 8.8-4, 6.11-6, 6.12-12a, 8.9-8, 10.3-2.

6th edition: 8.7-4, 7.8-6, 7.9-12a, 8.8-8, 10.2-2.

Note: For full credit, you need to do 8 out of 9 graduate problems. The graduate problems can be turned in any time before the final exam (there is no other deadline). If you submit your graduate problems well before the final exam and do not get full credit, you can correct your mistakes and resubmit the problems until you get full credit. So the early you start working and submitting the results the better for you.
